RE: Construction of Head Office Facilities  
FARO Medical Technologies

Dear Randy:

As a first-time developer in the Orlando area, I have a deep gratitude to Fred Shipman of Shipman Associates Inc. for his strong recommendation in your favor during the bidding process on our project.

The six months' experience which, as we both know, included all the usual headaches relating to construction, can be best described as one of the most pleasant construction jobs that I have experienced. The professionalism of your company and the dedication of the supervisors on site made the entire process an efficient and pleasant one. To my great astonishment, when there were design inadequacies, as there always are, from the architect's drawings, you always made alterations in our favor, giving us a building of superior quality and finish.

More important than all of the above, I always had the sense that I was working with people of uncompromising honesty and dedication. The long hours spent by your staff in order to meet schedule were very much appreciated.

Once again, I would like to thank you very much for your prompt, courteous, honest, and dependable service. I am sure that the long history of Aagaard-Juergensen will be perpetuated as long as you keep these high standards of business and workmanship.

Sincerely,

Simon Raab  
President  
FARO Medical Technologies US Inc.
