Orlando, FL 32810

Dear Randy:

This is a long over due thank you letter for you and your company's efforts in building the new MBI building. Every time I drive into the parking lot and every time I walk through our new building I am filled with thanks and appreciation for the beauty and functionality it represents.

I never dreamed the planning and execution of this project could have been so complicated, protracted and challenging. Yet, none of the complications or difficulties was a result of your Company's efforts. To the contrary, you and your staff saved me time and money at every turn. You and your staff made sure I not only got the building I planned, but in fact a better built one because of the many suggestions you made during the construction process.

You brought a very challenging project in on time, despite many unexpected challenges, and the over all cost was significantly less than I would have thought before we went through the bid process.

I can't thank you enough for the magnificent building we will use and enjoy for many years to come.

Sincerely,

James J. Grogan
President/CEO
